April 5, 1983

Gentlemen,

On March 14, 1983, the California Division of Oil and Gas recieved primacy over Class II injection wells under the Federal U.I.C. program. This primacy enables the D.O.G. to retain regulatory control over the reinjection of produced oilfield water with certain imposed restrictions and changes. Among these restrictions are non-exempt aquifers which have previously been approved for injection.

Under the new regulations, all injection into these non-exempt aquifers must cease by September 14, 1984. One of these zones is the Walker zone in Round Mountain field for which our records show you have a currently approved water disposal project.

An appeal of this decision is being prepared by this Division for submittal to the Environmental Protection Agency. If you have any data you feel may be helpful in this appeal or have any questions regarding the application, please contact this office. Should our appeal be rejected, all injection into the Walker zone, Round Mountain field, must be terminated by the September 14, 1984 deadline date.

Yours Truly,

A. G. Hluza
Deputy SupervisorBy Daind Mitchell
Associate Oil & Gas Engineer
